

Managed Endpoint Detection & Response

Scalable, turnkey device protection for mid-to-large enterprises

Product Sheet: Managed Security

In the past 18 months, businesses suffered a 600% increase in phishing and a 33% increase in ransomware, with successful data breaches costing an average of almost \$4 million. Mitigating these attacks requires visibility into every network endpoint along with skilled personnel to respond 24/7 to threats—often at a high cost.

Peace of mind with Masergy Managed EDR

Masergy Managed Endpoint Detection & Response (EDR) is a turnkey solution providing 24/7 continuous threat monitoring, alert triage, and incident handling by experienced analysts in Masergy security operations centers (SOCs) on three continents. CISOs and CIOs alike benefit from unified prevention, detection, and response that scales with your business to cover every network endpoint.

Masergy Managed EDR leverages machine learning to act as a gatekeeper between the operating system of an endpoint device and any malware. It provides prevention and detection of attacks across all major vectors, rapid elimination of threats with fully automated, policy-driven response capabilities, and complete visibility into the endpoint environment.

Endpoint attacks happen around the clock and your onsite IT resources are limited. Masergy Managed EDR makes it easy and affordable to protect your enterprise with certified cybersecurity professionals working 24/7 for you in our global SOCs. Choose Masergy to become a trusted extension of your IT team.

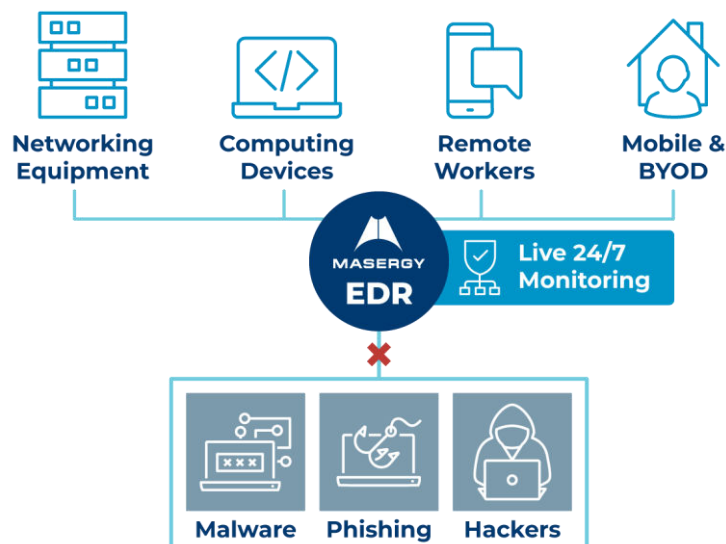

Features

- Turnkey managed cybersecurity protection for every endpoint on your corporate network
- Proactive AI-enhanced hunting and detection of malware, ransomware, and other security threats
- Cloud-delivered agents compatible with full range of enterprise devices and IoT

Benefits

- Real-time detection of cybersecurity threats to both onsite and remote workforces
- Fast 24/7 incident response from industry-certified cybersecurity experts
- Improves compliance and risk management

Automated threat detection with live 24/7 response
